I should have asked to see your NCAA predictions before I turned in my bracket.

It is going to be a very busy rest of the year, and agree with your suggestion for regular get togethers.

By the way, Kelly Madalinski asked me this morning what I thought EPA was going to say. I said I think they'll provide a month extension on the revised RI, but stick with Nov. 15 for the draft FS. Damn, I should have bought a lottery ticket!

I thought yesterday's meeting was very good. I think me, you, Bob and Kristine should get together on a regular basis because the next 8 months are going to fly-by. I'll check with Bob to see if he agrees. Jim.

Subject: PH RI/FS revised RI and draft FS submittal dates

Bob and Jim,

This is to provide EPA's determination regarding the submittal dates for the revised RI and draft FS reports. EPA has considered the draft letter that was provided with the LWG's March 9, 2011 request for an extension of the deadline to dispute the revised RI and draft FS submittal deadlines, and our recent discussions on this topic.

Revised RI Report  
In our February 25, 2011 letter EPA provided two options for the revised RI report submittal deadline: 1) September 28, 2011 if the LWG

provides  
an acceptable schedule for submittal of preliminary revised  
sections of  
the report for EPA review and feedback, or 2) August 1, 2011 if  
preliminary sections of the report are not submitted in advance  
of the  
revised RI report. It is our understanding that the LWG does  
not intend  
to provide a schedule that includes submittal of preliminary  
sections of  
the RI for advance EPA review. EPA has considered the LWG's  
input and  
is willing to extend the submittal date of the revised RI report  
an  
additional four weeks to August 29, 2011.

Draft FS Report  
EPA has considered the LWG's input regarding this deadline but  
is not  
willing to extend the submittal date for the draft FS Report.  
The  
deadline for submittal of the draft FS Report is November 15,  
2011 as  
directed by our February 25, 2011 letter.

EPA understands that meeting these deadlines may be challenging,  
but  
these submittal dates also represent significant extensions to  
the  
original deadlines for these documents. We look forward to  
working  
with the LWG to help expedite completion of these reports.
